

Behind the Scenes

I

By Jonas Chavez

In our efforts to become America's leading company in the job search industry, we have come to understand the importance of having the best equipment in our production department.

Therefore, we frequently acquire new equipment in order to increase the quality of our products. Our production department has just purchased three Laser Mail 5030 High-Volume Envelope Printers. Utilizing these printers will allow our department to increase its envelope-printing capacity from 20 envelopes per minute to 40 envelopes per minute. These newly released printers come with improved image quality technology, which translates into close-to-perfection print quality. Each of these printers comes fully loaded, with an envelope stacker that is able to stack as many as 400 envelopes at once, as well as a commercial conveyer to handle printed envelopes. With this new technology, we will be able to increase productivity in our department, making it possible for our valued clients to receive their orders more quickly and with higher levels of quality. These new acquisitions will increase the likelihood that our clients will have successful job searches. As our clients well know, here at Legal Authority, we are always happy to be of service.
